

KRISHNA MISHRA

Address: Pune Division, Maharashtra, India
Email: krishna1307mishra@gmail.com
Linkdein: linkedin.com/in/krishnamishra13/

SUMMARY

Computer Science undergraduate focused on Artificial Intelligence, Generative AI, and software development. Hands-on experience through internships, entrepreneurship, and technical projects, building AI-powered applications, responsive web interfaces, and data-driven solutions with Python, JavaScript, React, Node.js, IBM watsonx, Gemini API, and Tableau.

EDUCATION

B.Tech, Computer Software Engineering — MIT Academy of Engineering	Sep 2025 – 2029
HSC, Science — Bankar Patil Educational Campus (86.00%)	Jun 2023 – Mar 2025
SSC — De Paul English Medium School (94.40%)	Apr 2023

WORK EXPERIENCE

Co-Founder — Indian Pixel	Jul 2026 – Present Remote
- Co-lead vision, strategy, and technology initiatives of an early-stage venture; lead development of websites, software solutions, and digital platforms. - Contribute to product development, business strategy, and client solution delivery, including debugging and UI development.	
Frontend & UI/UX Design Intern — Drishyam	Aug 2026 – Sept 2026 Remote
- Contributed to frontend development and UI/UX design for responsive digital experiences, working with Computer Vision and Edge AI concepts for security applications. - Apart from frontend contributing in other technical tasks such as AI/ML and integrating AI APIs.	
Artificial Intelligence Intern — CodeAlpha	Jun 2026 – Jul 2026 Remote
Developed AI applications in Python, including an AI-powered FAQ chatbot and language translation solution, using Git/GitHub for version control.	
Intern — IBM SkillsBuild, Edunet Foundation	Jun 2026 – Jul 2026 Remote
Built AI and cloud-based projects using IBM Cloud, watsonx, Python, and Jupyter Notebooks, covering ML, Generative AI, and data analytics.	

PROJECTS

Startup Mentor — AI-Powered Startup Blueprint Generator
Built an AI platform generating structured 19-section business blueprints; integrated IBM watsonx Orchestrate with a Node.js/Express backend and a React/Vite frontend with PDF export.
Qlockain — Blockchain-Based Digital Identity Vault
Developed a Flask-based digital identity and document-verification platform with blockchain logic for tamper-resistant document management.
Future of Work in the Age of AI — Data Analytics & Visualization
Analyzed a Kaggle workforce dataset and built Tableau/Orange Data Mining dashboards to identify AI-driven skill demand and job-market trends.

SKILLS

- Programming:** Python, JavaScript, C, Java
- Web:** HTML, CSS, React, Vite, Node.js, Express.js, REST APIs
- AI/ML:** Generative AI, Machine Learning, Prompt Engineering, Agentic AI, Computer Vision
- AI Platforms:** IBM watsonx, IBM Cloud, Gemini API
- Data:** Data Analysis, Tableau, Orange Data Mining
- Tools:** Git, GitHub, Jupyter Notebook, VS Code

CERTIFICATIONS & JOB SIMULATIONS

- AWS:** Foundations of Prompt Engineering, Building Language Models, No-code ML & Generative AI on AWS
- IBM:** AI Fundamentals, Cybersecurity with Generative AI, Quantum Computing, Journey to Cloud
- Cisco Networking Academy:** JavaScript Essentials 1 & 2, Data Analytics Essentials, Introduction to Modern AI
- Job Simulations:** JPMorganChase (Software Engineering), Deloitte (Data Analytics, Technology, Cyber Security), Mastercard (Cybersecurity), Datacom (Software Development)
- Anthropic:** Claude 101, AI Fluency: Framework & Foundation, For Students, For Non-profits
- Other:** IBM SkillsBuild Internship (Edunet Foundation); nasscom Digit 101
